

Environmental and Quality policy of the Weatherdock AG

A main part of the practice of the Weatherdock Inc. is the compliance with the environmental related laws and regulations. This is also expected by us from our business partners and suppliers.

Environmental protection means for the Weatherdock Inc. to use the natural resources very carefully. In our FMEA workshops, during product- and process development we do already have in mind the possible consequences and burdens for the environment. It is our clear target to prevent– beyond the valid regulations - future environmental stress.

The goal of the Weatherdock Inc. is to reach Quality at all levels. Quality is not made in one department, but in the whole company by means of the performed services, the generated products and processes.

Herewith we reach a high level of customer satisfaction, which we want to keep and increase. All employees identify and treat the customers as our focus of attention and endeavours of the company. This customer philosophy is alive in mind at all the staff.
